SUMMARY

After I completed my first year of college, I realized that I wasn't sure what I wanted to do career wise, so I decided to put that on hold. I've learned a few things about myself while out in the work force that I think make me a strong candidate for the position. I am self-motivated and like to be challenged. I love to build things and create solutions to problems. Baring that in mind its easy to see why I took up a career in Web development. My recent education venture at the UCF Coding Bootcamp has taught me numerous valuable skills some of which being: HTML, CSS, JavaScript, Node, BootStrap, Materialize, and much more. I am excited to see where my future endeavors take me!

ANTHONY AGUIAR
